Subject: GLO meeting

----- Message Contents -----

as you may know, the director signed the GLO MOU this week. yesterday and today, Bob, mike del colle, and i held meetings with GLO on technical approaches to this project, including objectives, overall schedules, and tasks. We are on the same wavelength and are both excited about the joint project.

We intend to take this winter to assemble data on leases and gas routing, identify customers, begin discussions with end users, establish relationships with pipelines, their marketing affiliates, and federal/state end users, and work toward resolving difficulties in the transportation arena. LOTS OF NUTS AND BOLTS WORK!!!!

Ray and Sue are assembling customer inventories. We have needs for folks to help us out on the other aspects. Any volunteers?
